EDUCATION

Allegheny College, *Meadville, PA*
Bachelor of Science in Data Science
Minor in Economics

Expected: May 2026
GPA: 3.245

Honors & Awards: Alden Scholar

Relevant Coursework: Computational Expression, Data Structures, Data Science, Data Exploration, Deep Learning, Programming Languages, Peer Mentoring, Independent Study

Senior Composition: CaddySense: AI Golf Performance Assistant

Independent research project will be written and orally defended

- Designed and implemented a fully local, privacy-preserving AI golf performance assistant integrating SQLite, Python-based analytics, and an on-device LLM (Ollama Phi-3).
- Built a structured data pipeline that stores player performance metrics and generates interpretable visualizations, including distance distributions, accuracy trade-offs, and radar-based skill profiles.
- Developed an AI coaching module that analyzes individual performance trends and produces personalized improvement feedback using natural language reasoning.
- Created a recommendation engine that suggests course types and training focuses based on metric-driven strengths and weaknesses.
- Evaluated system performance through interpretability, user trust, and accessibility criteria, demonstrating how explainable AI improves golfer decision-making compared to existing tracking apps.
- Established an ethical framework emphasizing transparency, local computation, user ownership of data, and responsible deployment of AI-based coaching tools.

RELATED EXPERIENCE

Data Gators Consultant, Allegheny College, Meadville, PA

Aug 2025 - Present

- Provide one-on-one support to students and researchers using Python and R for data analysis, visualization, and computational workflows, improving project accuracy and efficiency.
- Assist with data cleaning, statistical modeling, and machine learning abilities, allowing peers to apply advanced analytics techniques confidently.
- Guide peers through research design, project planning, and interpretation of results, teaching independent problem-solving and critical thinking.
- Teach visualization methods to communicate insights effectively, enhancing presentation quality for class projects and research.
- Support campus-wide computational skill development, increasing student confidence in data-driven analysis across multiple disciplines.

Technical Leader, Computer Science Department, Allegheny College, Meadville, PA

Aug 2025 - Present

- Mentor students in Data Science and Computational Expression courses on programming concepts, debugging, and project development.
- Provide personalized guidance during office hours to enhance student understanding of Python programming and data analysis workflows.
- Offer feedback on code structure, problem-solving, and analytical thinking, helping students achieve higher performance in assignments.

WORK EXPERIENCE

Golf Operations Assistant, Olde Stonewall Golf Club, Ellwood City, PA

Jul 2019 - Present

- Prepared, staged, and maintained a significant number of golf carts daily, ensuring efficient operations

for members and guests.

- Collected, cleaned, and restocked driving range balls while maintaining equipment and layout for optimal use. Assisted pro shop staff with customer service, handling member requests, and improving overall satisfaction.
- Supported event setups and managed operations during tournaments and busy weekends, contributing to a seamless event experience.

CLASS PROJECTS

Golf Tournament Winner Prediction Using Neural Networks, Allegheny College, Meadville, PA

Feb 2025 - Apr 2025

- Developed and trained a neural network model to predict golf tournament winners using three key features: driving distance, green in regulation percentage, and scoring average.
- Expanded dataset to 50 points and performed data preprocessing, improving model accuracy and generalizability.
- Evaluated multiple activation functions (Sigmoid, ReLU, TanH) and hyperparameters, optimizing model performance and stability.
- Presented findings using visualizations and statistical interpretation to faculty and peers, demonstrating insights into predictive factors in golf performance.

Python vs. R Data Tidying Experiment, Allegheny College, Meadville, PA

Mar 2025 - Apr 2025

- Cleaned and analyzed a large dataset to produce a Tidy Data table in both Python and R, measuring memory usage and runtime for comparison.
- Created visuals to highlight key differences in efficiency and reproducibility between the two languages
- Presented results to multiple faculty and peers, emphasizing lessons learned in reproducible research. Focused on improving data cleaning workflows and understanding language-specific performance trade-offs.

CNN Fine Tuning Lab (ShuffleNet & MobileNet), Allegheny College, Meadville, PA

Mar 2025

- Fine-tuned pre-trained ShuffleNet and MobileNet models on the CIFAR-10 dataset, experimenting with activation functions (LeakyReLU, Swish) and network width adjustments.
- Trained and validated models, comparing accuracy, loss, and training efficiency with adjustments.
- Visualized results and presented experiment outcomes to peers and faculty, explaining the impacts of architectural changes on model performance.

LEADERSHIP

Student-Athlete Advisory Committee (SAAC) Representative, Allegheny College, Meadville, PA

Aug 2025 - Present

- Represented varsity golf team in weekly meetings, advocating for student-athlete needs and contributing to discussions on academic, athletic, and social initiatives.
- Collaborated with 23 varsity teams, administration, and faculty to promote effective communication and strengthen relationships within the college and athletic conference.
- Organized programs to increase independence and engagement in athletic events, fostering sportsmanship, cooperation, and community support across teams.

ATHLETICS

Captain, Men's Golf Team, Allegheny College, Meadville, PA

Aug 2025 - Present

- Be a leader to a 9-member varsity golf team, advising team lifts, tournament preparation, and team programs.
- Practiced substantial hours weekly and competed in multiple collegiate tournaments, achieving measurable improvements in team dynamics.

- Projecting team leadership and sportsmanship within the team, organizing team events, and supporting new team members' development.

Member, Men's Golf Team, Allegheny College, Meadville, PA

Aug 2022 - Aug 2025

- Practiced numerous hours weekly and played in several tournaments per season, contributing to team scoring and competitive strategy
- Collaborated with teammates to analyze performance skills and improve across future rounds.
- Supported team events and fundraising activities to enhance program visibility and community engagement.

SKILLS

Computer: Microsoft Word, Excel, PowerPoint, Photoshop, G Suite - Docs, Slides, Sheets

Programming/Software: Python, R, Java, SQL, Data Visualization, Machine Learning, Deep Learning, PyTorch, Tableau, Vs Code, Google Colab, R Studio

Lab Skills/Techniques: Measurement and Calibration, Electronics and Circuit Building, Titrations, 3D Printing, Data Analysis and Quantitative Reasoning, Experimental Design, Advanced Research and Synthesis, Data Cleaning, Training Models

Trainings: CITI Research, Peer Mentoring, Tutoring Training, Mental Health Awareness
